### SUMMARY

Cybersecurity student at Faculty of Computer and Data Science, Alexandria University, seeking to apply technical skills in penetration testing, network security, and vulnerability assessment while gaining hands-on industry experience.

### EDUCATION

#### Alexandria University

Bachelor's Degree in Computer Science

- Cumulative GPA: 3.7

10/2023 – Present

Alexandria, Egypt

### PROFESSIONAL EXPERIENCE

#### Information Technology Institute (ITI)

Cyber Security Summer Training

- Attended an intensive training program at the Information Technology Institute (ITI), mastering 5 core areas including CCNA networking fundamentals and ethical hacking techniques, establishing a robust foundation for enterprise-level IT roles.

08/2025 – 09/2025

Alexandria, Egypt

#### HackerRank

Linux Fundamentals Workshop

- Completed a Linux Fundamentals workshop covering basic Linux commands, file systems, and system navigation.

02/2025 – 04/2025

Alexandria, Egypt

#### Safwa FCDS

Java Programming Workshop

- Accomplished a Java workshop covering object-oriented programming fundamentals and core Java concepts, building multiple Java-based applications and exercises.

10/2023 – 01/2024

Alexandria, Egypt

### COURSES

#### eJPT Preparation Course

Udemy

- Currently pursuing eJPT certification covering penetration testing fundamentals, reconnaissance, exploitation techniques, and web application security.

04/2026 – Present

#### CCNA Training (ITI)

Information Technology Institute (ITI)

- Took a CCNA training covering networking fundamentals, routing & switching, VLANs, subnetting, and many others.

08/2025 – 09/2025

Alexandria, Egypt

#### OOP with Java

Udemy

- Had a Java programming course focusing on OOP concepts including classes, objects, inheritance, and polymorphism.

02/2024 – 05/2024

## PROJECTS

---

### Advanced Cybersecurity Exploitation Lab

05/2026

#### *Offensive Security & Authentication Analysis*

- Conducted practical cybersecurity testing across 6 attack vectors using 9 Linux-based security tools, performing username generation, Active Directory discovery, password cracking, session analysis, Hash Length Extension Attack, and TOTP authentication analysis.

### Web Application Security Assessment & Hardening

04/2026

#### *Penetration Testing & Defensive Security Project*

- Practiced penetration testing on a vulnerable web application, identifying and exploiting 6 vulnerabilities across 5 classes (SQLi, XSS, IDOR, CORS, Path Traversal), then deployed a WAF and applied targeted mitigation techniques to fully remediate all findings.

### Multi-Site Company Network Design

11/2025

#### *Cisco Packet Tracer – Enterprise Network Simulation*

- Developed a 2-site corporate network topology in Cisco Packet Tracer, configuring 9 VLANs, 4 routers, DHCP, DNS, STP, NAT, and ACLs with proper segmentation and security enforcement.

### University Management System Database

12/2024

#### *MS SQL Server – Database Design Project*

- Designed a university management system database in MS SQL Server, architecting a 6-table relational schema with 20+ SQL queries for efficient data management, retrieval, and reporting.

## SKILLS

---

- **Hard Skills:** Network Security, Linux Fundamentals, Cryptography concepts, Wireshark, Python/Bash scripting, OWASP top 10, Burp Suite, Metasploit, Nmap
- **Soft Skills:** Active Listening, Leadership, Time Management, Problem-Solving

## CERTIFICATIONS

---

EF SET Certificate (C1 level)

ITI Cybersecurity training certificate

Linux Fundamentals Certificate

Cybersecurity for beginners (MaharaTech)

## LANGUAGES

---

Arabic — Native

English — Fluent
