SUMMARY

Cybersecurity student at Faculty of Computer and Data Science, Alexandria University, seeking to apply technical skills in penetration testing, network security, and vulnerability assessment while gaining hands-on industry experience.

EDUCATION

Alexandria University

10/2023 – Present

Bachelor's Degree in Computer Science

Alexandria, Egypt

- Cumulative GPA: 3.7

PROFESSIONAL EXPERIENCE

TechTrek

07/2026 – 09/2026

Bug Bounty & Web Application Penetration Testing Training

Alexandria, Egypt

- Completed a 120-hour intensive web security training program covering reconnaissance, authentication & access control, business logic vulnerabilities, XSS, path traversal, and other web application security techniques through hands-on labs.

Information Technology Institute (ITI)

08/2025 – 09/2025

Cyber Security Summer Training

Alexandria, Egypt

- Attended a 90-hour intensive training program at the Information Technology Institute (ITI), mastering 5 core areas including CCNA networking fundamentals and ethical hacking techniques, establishing a robust foundation for enterprise-level IT roles.

HackerRank

02/2025 – 04/2025

Linux Fundamentals Workshop

Alexandria, Egypt

- Completed a Linux Fundamentals workshop covering basic Linux commands, file systems, and system navigation.

Safwa FCDS

10/2023 – 01/2024

Java Programming Workshop

Alexandria, Egypt

- Accomplished a Java workshop covering object-oriented programming fundamentals and core Java concepts, building multiple Java-based applications and exercises.

COURSES

Vulnerability Analyst & Penetration Tester Track

08/2026 – Present

Digital Egypt Pioneers Initiative (DEPI)

Menofia, Egypt

- Currently undergoing hands-on training in Network, Web, and Mobile Application Penetration Testing, covering vulnerability assessment, security testing methodologies, and practical exploitation techniques.

eJPT Preparation Course

04/2026 – Present

Udemy

- Currently pursuing eJPT certification covering penetration testing fundamentals, reconnaissance, exploitation techniques, and web application security.

CCNA Training (ITI)

08/2025 – 09/2025

Information Technology Institute (ITI)

Alexandria, Egypt

- Took a CCNA training covering networking fundamentals, routing & switching, VLANs, subnetting, and many others.

PROJECTS

Leantime Web Application Penetration Test

09/2026

Web Application Security Assessment

- Conducted a penetration test on the Leantime open-source web application, performing reconnaissance, enumeration, vulnerability assessment, and exploitation to identify and document security weaknesses

Vulnerable Web Application & Security Hardening

08/2026

Web Application Penetration Testing & Remediation

- Developed a deliberately vulnerable web application, performed penetration testing to identify security vulnerabilities, then implemented security patches and validated the fixes through a follow-up security assessment.

Advanced Cybersecurity Exploitation Lab

05/2026

Offensive Security & Authentication Analysis

- Conducted practical cybersecurity testing across 6 attack vectors using 9 Linux-based security tools, performing username generation, Active Directory discovery, password cracking, session analysis, Hash Length Extension Attack, and TOTP authentication analysis.

Web Application Security Assessment & Hardening

04/2026

Penetration Testing & Defensive Security Project

- Practiced penetration testing on a vulnerable web application, identifying and exploiting 6 vulnerabilities across 5 classes (SQLi, XSS, IDOR, CORS, Path Traversal), then deployed a WAF and applied targeted mitigation techniques to fully remediate all findings.

Multi-Site Company Network Design

11/2025

Cisco Packet Tracer – Enterprise Network Simulation

- Developed a 2-site corporate network topology in Cisco Packet Tracer, configuring 9 VLANs, 4 routers, DHCP, DNS, STP, NAT, and ACLs with proper segmentation and security enforcement.

SKILLS

- **Hard Skills:** Network Security, Linux Fundamentals, Cryptography concepts, Wireshark, Python/Bash scripting, OWASP top 10, Burp Suite, Metasploit, Nmap
- **Soft Skills:** Active Listening, Leadership, Time Management, Problem-Solving

CERTIFICATIONS

EF SET Certificate (C1 level)

Cybersecurity Training Certificate (ITI)

Bug Bounty & Penetration Testing Certificate (TechTrek)

Linux Fundamentals Certificate (HackerRank)

Cybersecurity for Beginners (MaharaTech)
